Course Number
FHWA-NHI-380076

Course Title
Low-Cost Safety Improvements Workshop

This course provides a comprehensive presentation of low-cost, ready-to-use improvements that enhance the safety of highways. The course covers a synthesis of countermeasures and their associated crash reduction factors as identified in the “AASHTO Strategic Highway Safety Plan -- NCHRP 500 Guidebooks.” Countermeasures for specific areas of highway safety, including roadside hazards; signing, markings, and lighting; traffic control devices; intersections; traffic signals; and railroad grade crossings are discussed. The course also introduces recent low-cost safety improvements that have been developed by States and local engineers. Through exercises, participants learn how to analyze highway safety situations and apply appropriate countermeasures to those situations.

Outcomes
Upon completion of the course, participants will be able to:

• Identify appropriate engineering countermeasures from crash patterns
• Recognize deficiencies in operation/design and select appropriate countermeasures for roadside hazards
• Recognize deficiencies in safety performance of signing, markings, and lighting, and elect appropriate countermeasures
• Recognize deficiencies in operation/design of intersections and select appropriate countermeasures
• Recognize deficiencies in operation/design of traffic signals and select appropriate countermeasures
• Recognize deficiencies in operation/design of railroad grade crossings and select appropriate countermeasures
• Illustrate new and innovative low-cost safety improvement measures developed by State DOTs

Target Audience
Federal, State, and local transportation, traffic and safety engineers, and planners involved in reducing crashes.

Training Level: Accomplished

Fee: 2020: $155 Per Person; 2021: N/A

Length: 1 DAYS (CEU: 0 UNITS)

Class Size: Minimum: 20; Maximum: 30

NHI Customer Service: (877) 558-6873 • nhicustomerservice@dot.gov
