Monthly News from the National Highway Institute

Learn strategies to reduce traffic fatalities in Speed Management

This 1-day Instructor-led training emphasizes how state and local governments can improve community safety by integrating speed management principles into three critical safety focus areas:
- Roadway departures
- Intersections
- Pedestrians and bicyclists

In this transportation training, participants learn lifesaving countermeasures that shape speed management programs and how these can help communities combat speeding-related injuries and deaths.

NEW & UPDATED COURSES

NHI offers new and updated transportation trainings based on the latest technologies, best practices and industry advancements. Select the link for any course to learn more about it, submit a host request, or view scheduled sessions to attend.

Asset Management
- Introduction to Financial Planning for Transportation Asset Management

Risk Management

Communications
- Instructor Development Course (IDC) for Web-conference Training

Construction and Maintenance

Rockfall Stabilization
Freight and Transportation Logistics

Fundamentals of Freight Data Workshop

Geotechnical

Ground Modification Methods (Full Version)
- Ground Modification Methods (Abridged Version 1: Lightweight Fills, Deep Compaction, Soil Mixing, and Grouting)

Highway Safety

Speed Management

Hydraulics

Hydraulic Toolbox

Culvert Hydraulic Analysis and Design Program (HY-8)

Intelligent Transportation Systems

ITS Procurement

Structures

Design and Evaluation of Bridges for Fatigue and Fracture

Tunnel Safety Inspection Refresher Prerequisite

LRFD Design of Common Bridge Elements: Decks and Bearings

LRFD Steel I-Girder Details Design

Prestressed Concrete Girder Topics
