NHI to Recognize National Transportation Week: May 12-18

Every day people around the Nation rely on the roads, rails, and skies to travel to and from their destinations. Since its 1962 declaration, National Transportation Week has provided an opportunity to highlight the accomplishments and commitment made to transportation operations Nationwide.

In recognition of this week (May 12-18), NHI will present a series of trainings that range across the 17 program areas.

NHI continues to deliver on its pledge to offer high-quality training to transportation professionals, and ensure highways are safe for motorists. For more information on NHI’s courses, please visit the NHI Web site.

Course Spotlight: Transportation Asset Management Courses

Transportation asset management (TAM) is a strategic approach to managing physical transportation infrastructure. TAM programs minimize life-cycle costs for managing and maintaining transportation assets, including roads, bridges, tunnels, rails, and roadside features.
The Moving Ahead for Progress in the 21st Century Act (MAP-21) mandates that all States must have asset management plans in place by 2015. NHI offers a series of courses designed to help transportation organizations build successful asset management programs, and to give guidance in the development of asset management plans that comply with MAP-21 requirements.

131106 Introduction to Transportation Asset Management
131106A Introduction to Transportation Asset Management with Workshop
131106B Development of a Transportation Asset Management Plan
131106C Introduction to the Development of a Transportation Asset Management Plan

NHI-Hosted Trainings at Arlington Facilities

In response to requests from the transportation community, NHI will host a series of NHI courses at our training facilities located in Arlington, VA. NHI will offer our most popular courses and others not widely offered in individual States.

Upcoming Sessions:
